Stampede Drilling Inc. Announces Amendments to Convertible Debentures

CALGARY, ALBERTA – Stampede Drilling Inc. ("**Stampede**") announces that it intends to amend the terms of its 10.00% convertible unsecured debentures (the "**Debentures**") by entering into amending agreements with each holder of Debentures (collectively, the "**Amending Agreements**"). The proposed amendments remain subject to Stampede obtaining final approval from the TSX Venture Exchange.

Under the terms of the Amending Agreements:

- the term of the Debentures will be extended by three years, such that the Debentures will mature in October 2023;
- the conversion price ("**Conversion Price**") of the Debentures will be lowered to \$0.21 per common share ("**Common Share**") of Stampede, subject to adjustment in accordance with the terms and conditions of the Debentures;
- Stampede will be able to pay accrued interest in Common Shares based on the average trading price of the Common Shares over the previous 30 trading days (subject to the prior approval from the Toronto Venture Exchange); and
- the redemption thresholds in the Debentures will be updated, such that Stampede: (i) may not redeem the Debentures prior to October 31, 2021; (ii) may redeem the Debentures on and after October 31, 2021 and prior to October 31, 2022 at the Redemption Price (as defined in the Debentures), provided the current market price of the Common Shares is at least 125% of the Conversion Price; and (iii) may redeem the Debentures on and after October 31, 2022 at the Redemption Price.

As of today, holders of 98.58% of the aggregate principal amount of the Debentures have entered into Amending Agreements with Stampede. Stampede expects to enter into Amending Agreements with all debentureholders prior to receipt of the final approval from the TSX Venture Exchange. In the event any of the remaining debentureholders elects not to enter into an Amending Agreement, such debentureholders' Debentures will continue to be in effect in accordance with their current terms.
